## Welcome to the École normale supérieure de Lyon!

Whether you are a student, a member of the academic community, administrative or technical staff, I would firstly like to congratulate you for joining ENS de Lyon.

Every new academic year is a key moment for our institution, even more so for you, and even for me this year. For you indeed, it is your first year; for me, after twenty-five years working at the university, I am back to the School I attended in the 1990s. Whatever your status, your field of study, or your position, I hope you will be as happy as I was here as a student in the physics department, and then as a doctoral student.

You will discover a unique School, where the quality of training and research is foremost. An ENS is a melting pot which, by intertwining training and research, aims at making a difference in world of research and higher Education, in France and abroad. The value of the students we welcome, the quality of the academic staff working here, the careers of our alumni, none of this would not exist without the ability of our institution to create and maintain an environment conducive to this demanding and permanent exchange between fields of study, skills, cultures and generations. The commitment of administrative and technical personnel also is a key factor for the success of our work; so are the relations with the national research organizations and our partners of the Lyon Saint-Étienne area.

My ambition is first and foremost to bring this quality to its highest. I am also convinced that we have a special responsibility as an École normale supérieure, rooted in public service: to bring out the fruits of the knowledge that we create and that we transmit to our students, beyond the premises of the School and the academic world. Our action will be guided by a few key principles: social openness, international development, the link between science and society, innovation and, of course, our contribution to the ideas and solutions that must be found to meet the challenges of the multiple transitions that we must achieve, particularly so in light of the ecological crisis we are currently facing.

During this academic year, I shall have the opportunity to discuss the life and the goals of the School with all our communities and partners, with the goal to shape a new School strategy. I hope that as "new entrants" at ENS de Lyon, you will participate in these discussions because this project must be shared with and by everyone.

I wish you a very happy 2023 academic year!

Emmanuel Trizac  
President

You have in your hands the ENS de Lyon students' welcome booklet which will serve as a guide and help you get to know our School. For all of you who are starting at the School this fall, you are joining an institution that trains through research: representing 70% of student career opportunities after graduating from the School. Thanks to this training through research, you will learn to think about a complex question, to examine it correctly and to solve it by knowing how to manage your time and develop an approach to answer it. You will learn so many skills that will be useful in the field of research but also in professional positions such as teaching, management or careers with high-level responsibility. This training is demanding, it requires curiosity, open-mindedness and capacity for innovation, to understand how you learn, so that you will be able to develop knowledge in turn. Our programs also rely on teaching methods that are unique: workshops, master classes, and tutored projects to multiply the approaches and methods.

Developing knowledge is a major challenge in our contemporary societies marked by multiple climate disasters, as well as environmental, geopolitical, local and global crises. As part of the ENS de Lyon diploma, you will pursue an education that trains you through research, opening your horizons via an experience of international mobility and consolidating your knowledge and skills through multidisciplinary programs, to best meet the challenges of our societies.

Numerous international agreements for mobility, working in the School's laboratories, a research library and individual support by researchers and teacher-researchers are all assets to help you build your individual training pathway through research. For those who join the School for a master's degree, this research requirement is at the heart of our training courses offered with the universities and schools of the Lyon Saint-Etienne site. The CHEL[s], "Collège des hautes études Lyon Sciences", in which ENS de Lyon takes an active role, is also a training partner.

For this new school year, the School welcomes the 2<sup>nd</sup> year promotion of the Sciences and Societies multidisciplinary cycle of higher education (CPES), as part of a partnership with the prestigious Lycée du Parc in Lyon. The student life offered by the School with its student residences, associations, junior labs, language center and sports center will enable you to build a strong community of like-minded people. And our wonderful alumni network will help you to keep in touch with this community as it grows!

Many services are at your disposal to accompany you during your training at ENS de Lyon, you will discover them in this booklet and of course, throughout the year. I am so happy to welcome everyone to ENS de Lyon and wish you a great start to the new academic year!

Emmanuelle Boulineau

## ENS DE LYON, STUDY FOR RESEARCH

ENS de Lyon is an elite French public institution that trains professors, researchers, senior civil servants as well as business and political leaders. Students choose their courses and split their time between training and research in Sciences and Humanities. Built on the tradition of ENS de Fontenay and Saint-Cloud, founded in 1880, ENS de Lyon also focuses on educational research. It is a symbol of French republican meritocracy and it remains committed today to disseminating knowledge to the widest audience and to promoting equal opportunity.

ENS de Lyon is part of Université de Lyon and supports quality research that has earned it a Fields medal (Cédric VILLANI, 2010) and many CNRS medals. It encourages interdisciplinary studies to foster a better understanding of complex contemporary issues.

## LYON, AN IDEAL CITY FOR STUDENTS

Congratulations! You chose Lyon, France's second biggest city in terms of student population, with 130,000 students including 15,000 international students. The city as a whole has an ideal size and energy; big but not overwhelming, dynamic yet relaxed, cosmopolitan and affordable. It's also ideally located – less than two hours by train from Paris, Marseille, Geneva and Europe's finest ski slopes.

Lyon is widely praised for its enviable quality of life, mind-blowing gastronomy and UNESCO world heritage architecture. The city boasts a rich history and buzzing cultural life. It's renowned for its spectacular Fête des Lumières, atmospheric concerts during the Nuits de Fourvière, ravishes movie buffs during the Lumière Film Festival and hosts the world-known Contemporary Art Biennial and Dance Biennial.

In 2022, the magazine *L'Étudiant* qualified Lyon as the 5<sup>th</sup> top French city for students. Also, in the QS World University Ranking Lyon is one of the best cities in the world for international students (2<sup>nd</sup> in France and 45<sup>th</sup> in the world).

*Come and see for yourself!*

## EQUALITY AND NON-DISCRIMINATION

### PREVENTION OF GENDER-BASED AND SEXUAL VIOLENCE

#### REPORTING INCIDENTS AND HELPLINE

For acts that may amount to gender or sexual discrimination, harassment or violence, a special procedure has been set up at ENS de Lyon. This procedure does not require you to have filed a formal legal complaint. It is conducted completely independently of any other legal action taken at a criminal level and is based on 4 principles:

- distinct stages involving key players who are independent from each other.
- a counselling team to listen actively to the person who has reported the case in a caring, objective and unprejudiced manner
- action carried out in agreement with the person who reported the case.
- procedures subject to confidentiality by the various stakeholders involved.

If you are a victim or witness of gender-based or sexual violence or any form of discrimination and harassment, you are invited to report it using:

- a dedicated email address: [signalement.violences.discriminations@ens-lyon.fr](mailto:signalement.violences.discriminations@ens-lyon.fr)
- an anonymous form (in French and English) available on the School's website, under the headings "About us > Our commitments > Fight against discrimination and violence".

The Equality advisors, the Equality and non-discrimination officer and the occupational psychologist are the only ones with access to this report. They will respond within a week to fifteen days maximum (except during school holidays or when the School's offices are closed).

If the person who filed the report wishes to continue the process, an appointment will be set up with two helpline advisors including a member of the Equality Team (Equality Team Officer and / or Equality Officer) or the occupational psychologist or a member of the Student healthcare (doctor or nurse). In agreement with the person being listened to, this information is then given to the Action Unit, which meets every fortnight, and, after studying the situation, draws up recommendations and forwards them to the Principal's Office. In agreement with the person who reported the incident, these measures are initiated after a decision by the Governing Board.

## THE EQUALITY PLAN

Committed to gender diversity and professional equality, since 2013, ENS de Lyon has formalized its commitments as part of an Action Plan for professional equality between women and men that was presented to staff representatives at the technical committee meeting of June 29, 2021, and validated by the Board of Directors, July 9, 2021. The action plan on professional equality 2021-2023 is divided into 5 objectives:

1. Assessing, preventing and addressing pay and career gaps

**NOISE DISTURBANCE**

Remember that you have neighbors. Please think about the people who live in your neighborhood. We often receive complaints from them when they are disturbed at night by noise coming from our student residences. When enjoying a celebration on the Descartes site, remember to make as little noise as possible when you leave the venue.

**ACTION TOWARDS ECOLOGICAL TRANSITION**

ENS de Lyon is committed to taking action towards ecological transition that will involve all its work and projects, training, research, transmission of knowledge, management of premises, and campus life. An Ecological Transition Project Manager was appointed at the start of the 2022 academic year to work with the presidency of ENS de Lyon, in charge of a "roadmap" for the institution. A dedicated team and many stakeholders are working on everything that can be implemented in the School to achieve our goal of reducing our carbon footprint by 50% by 2030, but also to influence the content of training, research projects and practices, as well as the management conditions of our campus and working practices, to meet the challenges of these changes.

The institution has embarked on a process of labeling Sustainable Development and Social Responsibility, which we would like to present in 2025. This approach concerns us all, and everyone can play their part, even by taking tiny individual initiatives. We are also fortunate to have a remarkable garden, a place conducive to biodiversity, and it is up to us to preserve this. On campus, you will find:

- An incentive for soft mobility, with plenty of places for bicycles and two bike maintenance/repair stations
- A selective sorting system with sorting bins
- Compost bins around the residences
- Measures to save energy, to bring us collectively to adopt new practices, in addition to building renovation work
- Tips and best practices on digital waste

In parallel, and in connection with teacher-researchers and associations involved in the ecological transitions, awareness-raising initiatives have been set up, for both students and staff: including climate frescoes, 2-ton workshops, and ecological awareness conferences.

**ASSET**

ASSET is the student association for international students. The students take part to our Welcome Week and help our international students in their first steps at ENS de Lyon. They can assist you for administrative formalities for example. ASSET also proposes different events all year long.

**THE RISKS OF ALCOHOL**

Be aware of the dangers of alcohol. Whether partying or relaxing in the evening, alcohol consumption increases the risk of illness

in adulthood and high-level alcohol consumption can be a gateway to later dependence. The short-term risks of alcohol abuse are also significant: lack of concentration and energy, poor quality sleep, loss of consciousness, violence either as a victim and/or perpetrator, non-consensual sex or road accidents; alcohol is responsible for 25% of deaths among 15–34-year-olds and it is the second leading cause of preventable death, just after tobacco.

If you have any questions or concerns about your alcohol consumption, take an appointment with the student medical service.

**SPORTS**

The sport facilities of ENS de Lyon are available to members 7 days a week. ENS de Lyon has two gyms, one of which is equipped with a climbing wall (100m<sup>2</sup> with a 10m section of overhang), a tennis court, 2 weight rooms as well as a dance room. Equipment is available free of charge (badminton and tennis rackets, balls...).

**REGISTRATION**

**SCHEDULES AND BOOKING**

– sport activities schedule is available online

<http://www.ens-lyon.fr/campus/sport>

**SOLIDARITY FUND****FOR STUDENT INITIATIVES (FSDIE)**

A financial tool for solidarity and cultural events, the FSDIE, to which the Alumni Association contributes, provides two types of assistance: social assistance to help students in a difficult situation; support collective projects of association or student groups to provide cultural events on campus, including sports, environmental or humanitarian initiatives for other students at ENS de Lyon or for the larger university community.

If you wish to apply, you need to make an appointment to receive an application form which once completed needs to be handed in at the Student Life and Alumni department.

**SOCIAL WORKERS**

For the foreign students, please contact the Social Service of the CROUS:

**ALUMNI OFFICE**

"Alumni" comes from Latin which literally means "pupil". The main activity of the Alumni Office is to identify, organize and connect the Alumni network from the Fontenay, Saint-Cloud and Lyon sites. The Alumni Office works in partnership with the Alumni Association (<http://lyon-normalesup.org>).

Its main activities are:

- the management of the Alumni ENS de Lyon site,
- the development of a professional network,
- the organization of Careers fair (in November): round table discussions for businesses.

By developing the Alumni network, ENS de Lyon fulfills its educational goal: providing expertise and skill sets, education, career development...

Former students are the "memory" of the institution, the network helps to sustain its spirit while opening it up to others.

## CULTURAL FACILITIES

At ENS de Lyon, there are cultural activities for everyone (open to all staff and students as well as the general public) created by student associations, training departments and research laboratories.

All the arts are present throughout the campus, with numerous facilities, associations, staff and external partners to promote artistic events. Some of the different places to produce and discover artistic creations are:

- **the Artemisia Gallery** that mainly hosts art exhibitions. It is equipped with the best equipment to present artwork (lighting, sound, etc.);
- **the Kantor Theater** is a theater-school that reflects the specificity of ENS de Lyon by combining research and training. It hosts the activities of the Arts section (master class, dramaturgy workshops, etc.), participates in the dissemination of scientific activities (film screenings, seminars, etc.) and provides a space for creation and communication for students, within associations (ENScène, Champ Libre) and institutional partnerships with other institutions (CNSMD, Opéra de Lyon...). The theater's program, open to everyone, is established by a commission based on a biannual call for projects (in May and November);
- **two workshops** on the Descartes site for **visual arts and photography**. They are accessible to all students through ENplaStik! which organizes courses and coordinates the use of the film development laboratory;
- **the hall of the Diderot de Lyon Library** is the place for numerous thematic exhibitions and meetings with writers and researchers;
- other spaces such as the **Dutilleux Hall** (D2.008, Descartes site), the **Félix Pécaut forum** (Descartes site), the **Verrière** (open only to the ENS community) in front of the library (Monod site) can also accommodate concerts, exhibitions or other forms of artistic expression.

ENS de Lyon also has a TV studio and a recording studio run by ENS Media.

## JEUNES AMBASSADEURS' PROGRAM

If you are a foreign student and have decided to pursue your studies in Lyon, make the most of your stay by becoming familiar with the rich cultural environment of your host city by meeting major institutional and business leaders thanks to the Jeunes Ambassadeurs' program. The program for a Jeune Ambassadeur lasts 6 months (from October to April) during which time the students will form a pair with their "business coach" and attend different events. Also, each student will put together a project linking – eco - nomically, culturally, scientifically, etc. – France and their home country. This project will be submitted to the association, and the successful ones will be rewarded. After benefiting from this program, upon return to their home country, the Jeunes Ambassadeurs will be able to communicate on the expertise of the companies and the relations established with their directors, encourage contacts between members of the Jeunes Ambassadeurs network, and facilitate international partnerships by communication information, finding required correspondents, etc.

- **For more information about the program, check the link: <http://www.jeunes-ambassadeurs.com/>**
